

Parsharamulu Mangol

Java • SpringBoot • Microservices • GenAI • Life & Health Insurance Domain
parshcript9032@gmail.com • +91-9032831306 • Hyderabad, India • 8+ Years Experience

PROFESSIONAL SUMMARY

Results-driven Technical Lead with 8+ years of dedicated experience at HCLTech, specializing in Java, Spring Boot, and Microservices architecture — serving a single long-term client in the Life & Health Insurance domain with deep institutional knowledge and consistent high performance. Led the design and delivery of 12 microservices, modernized 3 Mainframe modules to Java, and successfully migrated 9 legacy systems, driving complex digital transformations across IT modernization, data management, and member experience domains. Expert in implementing GenAI solutions (GitHub Copilot, Claude AI) to accelerate development workflows. Certified SAFE 6 Practitioner focused on delivering high-impact features in Agile and Kanban environments.

TECHNICAL SKILLS

Back-End	Java 17, Spring Boot, Groovy, JUnit, Kafka (Event-Driven Microservices)
AI & Cloud	GenAI (GitHub Copilot, LLMs), AWS Fundamentals, ML & AI Fundamentals, OpenShift, Docker
Front-End (GenAI)	Angular, React, HTML, CSS, JavaScript
Legacy & ETL	Mainframe (COBOL, JCL, DB2), ETL-DataStage
DevOps & Tools	GitLab CI/CD, Gradle, Control-M, Splunk, Elasticsearch, Kibana, Datadog
Testing & IDE	Postman, ReadyAPI, IntelliJ, VSCode, PuTTY, Eclipse

PROFESSIONAL EXPERIENCE

HCLTech - *Life & Health Insurance Domain -- Long-Term Client Engagement*
August 2017 - Present | Hyderabad, India

Role Progression:

- Technical Lead | Hyderabad | April 2024 – Present
- Senior Software Engineer | Mexico | March 2020
- Software Engineer | Chennai | August 2017

Key Responsibilities & Achievements:

- Technical Leadership & Delivery:** Led design and delivery of 12 microservices for Life & Health Insurance systems using Java and Spring Boot; consistently achieved Best Performer status across 8+ years.
- Architecture & Modernization:** Migrated 9 legacy systems and modernized 3 Mainframe modules (COBOL/JCL) to Java-based microservices, improving maintainability and performance.
- Event-Driven Integration:** Built Kafka-based microservices to capture real-time member updates and synchronize downstream databases seamlessly.
- GenAI Integration:** Integrated GitHub Copilot and Claude AI to accelerate development workflows and reduce boilerplate coding effort.
- End-to-End Development:** Managed full SDLC for System Process Modernization projects across digital transformation, IT modernization, data management, and member experience UI.
- DevOps Excellence:** Implemented GitLab CI/CD pipelines and containerized services using Docker for OpenShift deployment.
- Team Management & Security Leadership:** Led and mentored 4 engineers for on-time delivery; sole technical lead to independently identify and resolve critical security vulnerabilities with no prior team knowledge of the fix approach.
- ETL & Data Integration:** Designed ETL jobs to generate XML data and load into DB, meeting complex business requirements.
- Cross-Functional Collaboration:** Contributed as a core member in a 9-member team for end-to-end feature implementations across the insurance platform.

- **Monitoring & Reliability:** Used Splunk, Datadog, and Kibana for system health monitoring and proactive error tracking.

KEY PROJECT HIGHLIGHTS

Digital Transformation	Led end-to-end modernization of core insurance processing systems, replacing legacy Mainframe workflows with scalable Java/Spring Boot microservices.
IT Modernization	Migrated 9 legacy systems and 3 Mainframe modules to modern Java-based architecture; implemented CI/CD pipelines, reducing deployment cycles significantly.
Data Management	Built Kafka event-driven pipelines to capture and synchronize real-time member data updates across downstream systems and databases.
Member Experience UI	Contributed to front-end modernization delivering improved member-facing interfaces using Angular and React within the Life & Health Insurance domain.

SIDE PROJECTS — ANDROID APPLICATIONS

Personal Android Apps | Kotlin, Jetpack Compose, Room DB, MVVM Architecture

- Idea Tracker — Capture, organize, and track value ideas through implementation progress. (Published on Google Play Store: play.google.com/store/apps/details?id=com.valueideas.app)
- Career Guidance App — Helps parents and children explore and plan career paths with structured guidance.
- Java Roadmap App — Step-by-step Java learning roadmap covering core to advanced topics for developers.
- Event & Family Function Planner — Checklist-based planner to organize family events and track preparation tasks.

EDUCATION

B.Tech in Information Technology — VBCE / JNTU Hyderabad | 2014

CERTIFICATIONS & ACHIEVEMENTS

- Performance Excellence Award (2026) & Best Performer of the Year (2022) — Consistently ranked in the top tiers (1st or 2nd rating) over an 8-year tenure at HCLTech; recognized with XtraMiles reward points (redeemable) for outstanding contribution and delivery excellence.
- Certified SAFe 6 Practitioner — Expertise in Scaled Agile Framework methodologies.
- AWS Trainings — Fundamentals of Machine Learning & AI.
- Technical Training Certifications — Java, HTML, JavaScript, Python, and Cloud Computing via Programming Hub.

ADDITIONAL INFORMATION

Languages: Telugu, English, Hindi, and Spanish

Interests: Travelling, listening to music, exploring new technologies, and Android application development.
